14th Annual Conference General Information

WELCOME TO THE 2015 ASPE CONFERENCE

The 14th Annual Conference is here and we are so pleased that Denver has welcomed us in celebration of SP education and methodologies.

The 2015 ASPE Annual Conference is the collective vision of many collaborators and contributors. The exceptional Conference Committee, our ASPE staff, leaders from the field, and you – our dedicated members and conference attendees – have all helped to shape this year's outstanding program and unique learning experience.

This conference promises to engage you, showcase creative works, stimulate professional development, and provide ongoing opportunities to network and collaborate. In addition to sessions essential to our work—program development, assessment/evaluation, training, feedback, communication—we have presentations on extending SPs into new disciplines, hybrid and mixed modalities, incorporating technology, and certification of the healthcare simulation educator (activities I continue to challenge everyone to do). To ensure that we take care of ourselves along the way, there are sessions on stress relief and relaxation, and—many opportunities to sit down, connect, and network with your peers.

To start it off, Pamela Andreatta, PhD, EdD, MFA, will reflect on the essential role of simulated (standardized) patients in simulation-based clinical education. On Monday, Anne Marie Madziak, Hon B.A. MLIS, will challenge us to reimagine leadership as everybody's business. Then on Tuesday, Antoine Tesniere, MD, PhD, will give the state of address on virtual simulation.

To deepen your knowledge, I encourage you to take part in the networking and professional development opportunities the conference has to offer. Connect with members of the Board of Directors who are always happy to hear from you. Connect with an ASPE SIG or committee. ASPE has four Special Interest Groups (Hybrid, GTA/MUTA, Interprofessional Education (IPE), and exSPanding our graSP in non-healthcare professions) and nine committees who are seeking new members to help make ASPE an even stronger organization. I also hope you'll consider getting involved in one of these groups. It's the best way to stay connected to your colleagues throughout the year and guide ASPE's future.

With over 100 presentations, you are sure to be inspired. Connect with old and new friends and colleagues and visit the exhibit area to experiment and explore all the great products and resources for our field. This year's conference offers something for all learning styles, and career levels. We're delighted you are here! Thank you for your attendance, participation, and commitment to transforming professionals through the power of human simulation.

Sincerely,

*Karen ("K") Lewis, PhD
President*

Re-Imagining Leadership as Everybody's Business

Anne Marie Madziak, MLIS, Library Development Consultant, Southern Ontario Library Service, London, Ontario, Canada

Anne Marie Madziak is a library development consultant with Southern Ontario Library Service. In addition to consulting, facilitating, training and coaching, she coordinates the APLL Institute, a leadership development program aimed at public library staff with leadership aspirations. An important feature of the program is a strong focus on peer learning and the benefits of going through the program as a cohort, a community of learners who support and stretch one another and collectively create the conditions for optimal learning and growth. She has taught a leadership course in the MLIS program at Western University, and participated in a number of community leadership initiatives, including speaking at a Lean In London (Ontario) event inspired by Sheryl Sandberg's book.

Anne Marie is a passionate advocate of shared leadership and the need for leaders at every level of our organizations. She believes that conversation is a core leadership practice. It is in conversation that we share what we know, learn together and from each other, expand what we know, and cultivate relationships that allow us to use our differences creatively in the

14th Annual Conference

Welcome to the Conference

A dedicated group of ASPE members who form the Conference Committee has been planning the ASPE 14th Annual Conference at the Denver Marriott City Center, Denver, Colorado, for several months. As Conference Chair, I'm delighted to share some of the highlights with you! This conference promises to be filled with informative cutting edge sessions for all levels of learners in diverse formats that include workshops, presentation discussions, training techniques, posters, oral research reports, snapshot sessions, and much more.

There will be invaluable opportunities to interact with vendors and network with new and old colleagues. The book store is also returning this year with all the latest books pertinent to SP methodology. For the first time, we will have an interactive on-line schedule and a conference app that will help you to effortlessly negotiate through the meeting in addition to the printed program.

We had a record number of attendees and submissions this year, as well as invited workshops, reflecting the richness and perspectives of SP practice around the world. Sessions are arranged in diverse themes, including: Administration, Advancing Your SPs, Curriculum/Case Development, GTA/MUTA, Hybrid, Interprofessional Education, SP Educator Development, SP Methodology: Applications Beyond Medicine, and Technology.

For those of you who are returning from last year, we listened to your feedback! Food and posters are in separate areas and we scheduled a "poster crawl" on Monday, June 15, 1:00 - 2:00 pm. Posters will be presented in small, themed groups, led by facilitators who will guide you through short oral presentations by the authors, followed by questions. We've also included more snapshot sessions this year as many of last year's attendees really liked the diversity and pace of these shorter sessions.

Prior to the conference start on Sunday, there will be multiple networking opportunities including an orientation for first time conference attendees and a round robin information session introducing ASPE's four Special Interest Groups (SIGs) – Hybrid Simulation, Non-Medical/Expanded Uses of SPs, GTA/MUTA and Interprofessional Education. Find out how you can get more involved in ASPE by joining one of these groups! Every committee also welcomes new members. You will have a chance to find out about the various committees at the business meeting luncheon on Tuesday.

The conference kicks off with a key note by Pamela Andreatta, "*The Essential Role of Simulated (Standardized) Patients in Simulation-Based Clinical Education.*" Other plenary sessions feature "*Re-Imagining Leadership as Everybody's Business,*" delivered by Anne Marie Madziak, *SPs and Virtual Simulation* by Antoine Tesniere and *Everything ASPE*, with reports by our members-at-large and ASPE grant research presentations. Finally, at lunch on Wednesday, we will have a reflective debrief of the conference, featuring ASPE leaders and conference attendees, and a look forward to the next year's conference in Tampa.

We look forward to seeing you in Denver and learning from the vast pool of expertise that is gathered, confident that the scope and understanding of your practice will be expanded and enhanced. This is your conference and we greatly value your feedback as it helps us to improve each year. Electronic surveys will be sent out for your invaluable feedback.

I look forward to meeting you!

Best Regards,
Cathy Smith, Conference Chair

GRANTS AND RESEARCH COMMITTEE MISSION STATEMENT: The goal of the ASPE Grants & Research (G&R) Committee is to advance scholarship in the field of Standardized Patient (SP)-based education. Through various ASPE sponsored activities, the Grants & Research Committee supports members in acquiring knowledge and experience in order to contribute to the field through research, dissemination of research, and education.

The Scholars Certificate Program provides members' opportunities to develop foundational knowledge of SP focused scholarship through the completion of a six workshop series providing mentorship in goal setting, research methodology and dissemination of scholarly work. Members completing this program gain proficiency in practical skills including: conducting a literature search, writing and reviewing abstracts, creating and pursuing clear scholarship goals, gaining qualitative and quantitative research method knowledge and delivering effective oral and poster presentations. Once a member completes 6 G&R sponsored workshops or demonstrates competency in research modules with a combination

STANDARDS OF PRACTICE COMMITTEE _____

Chair: Lorraine Lyman

STANDARDS OF PRACTICE COMMITTEE MISSION STATEMENT: Standards of practice for the SP Educator profession is an important area which is in the process of development. An international task force has begun the task of developing the standards of practice for the organization using a variety of methodologies and resources. As a self-regulating organization, members of this profession are not required to be certified or accredited, yet wish to be able to articulate what it is that makes this professional body unique.

The Standards of Practice task force has initiated the process to define general principles, knowledge, skills, values and issues that encompass the overall and daily responsibilities of this profession which will serve a range of purposes. Once these practices are drafted and vetted, the committee will begin the process of membership review with activities such as written responses to questions posed on the ASPE website, discussion groups, presentations and written correspondence.

WEBSITE AND SOCIAL MEDIA COMMITTEE _____

Chair: Angela Blood

WEBSITE AND SOCIAL MEDIA COMMITTEE MISSION STATEMENT: The purpose of the ASPE Website and Social Media Committee is to communicate the goals and initiatives of the association, connect members with each other and with resources, and advance the professional development of educators who use human simulation methods through website and social media interfaces. The Society for Simulation in Healthcare (SSH) seeks to improve performance and reduce errors in patient care through the use of simulation. Established in 2004 by professionals using simulation for education, testing, and research in health care, SSH fosters the improvement and application of simulation-based modalities such as human patient simulators, virtual reality, standardized patients and task trainers. Recognizing that simulation represents a paradigm shift in health care education, SSH promotes improvements in simulation technology, educational methods, practitioner assessment, and patient safety that promote better patient care and can improve patient outcome.

SimUCare is a small spin off company that is committed to expanding the reach of standardized patients. Standardized patients allow a realism in simulation that high fidelity mannequins cannot. However, they are limited to non-invasive scenarios. SimUCare offers new low-tech products that can be worn by standardized patients to allow for a broader range of scenarios.
